To Whom It May Concern,

I am writing to recommend Elizaveta Kritova for their outstanding performance as a leadership student at University Paris Cite (EIDD). I haven't got the experience of knowing Elizabeth for long time, but during this period, I have been consistently impressed by her exceptional leadership qualities, commitment to her academic goal , and dedication to making a positive impact on our community.

Throughout her time at École d'ingénieur Elizabeth has demonstrated exemplary leadership skills in various capacities. She has taken on leadership roles in courses, where her ability to inspire and motivate peers has been truly remarkable. Elizabeth consistently goes above and beyond in their duties, showing a strong work ethic and dedication to her personal goals.

In addition to their leadership abilities, she has maintained an exceptional academic record. Her consistent high performance in math and physics showcases her intellectual curiosity and strong analytical skills. She is not only a performer but also a proactive learner who actively engages in discussions on our course and contributes valuable insights to class scientific discussions.

In conclusion, I believe that Lisa is an ambitious individual who embodies the qualities of an exceptional leadership student. I am confident that she will continue to pursue her goal in aerospace community and make a positive impact wherever she go.

I recommend Elizabeth Kritova and believe she have a bright future ahead of her. If you have any questions or need further information, please do not hesitate to contact me at isabelle.lambert@u-paris.fr

Sincerely,

Isabelle Lambert
