

U1333 Oral Health Laboratory Seminar Series

Guest Speaker: Lamont R. Jones, MD, MBA

Associate Chief Medical Officer, Henry Ford Medical Group, Henry Ford Health (Detroit, Michigan, USA)
Clinical Professor of Otolaryngology Michigan State University & Wayne State University

"Keloid Disease: A Global Unmet Need in Cutaneous Scarring and Fibrosis"

Friday, September 11 12:00 noon

Venue:U1333 Oral Health Laboratory

About the Speaker: **Dr. Lamont R. Jones** is an internationally recognized facial plastic and reconstructive surgeon, physician executive, and surgeon-scientist. His translational research focuses on the molecular mechanisms of keloid disease, including biomarker discovery, therapeutic targets, drug delivery systems, and advanced preclinical models. He has received more than $1.5 million in NIH and foundation funding and has delivered invited lectures throughout Europe, Asia, Australia, Africa, and North America.

Seminar Highlights

- Biology and pathogenesis of keloid disease
- Fibrosis and aberrant wound healing
- Emerging biomarkers and therapeutic targets
- Translational research and future clinical perspectives
